

Setup Visual Studio 2019 Community Edition (or Enterprise Edition)

1. Go to the Visual Studio website (<https://visualstudio.microsoft.com/downloads/>) to download the Community Edition.
2. Once downloaded, run the setup file.
3. Select only the “Desktop development with C++” workload (see screenshot below) then click on the “Install” button.

4. Once installed, open up the program then click on “Create a new project”.

Visual Studio 2019

Open recent

As you use Visual Studio, any projects, folders, or files that you open will show up here for quick access.

You can pin anything that you open frequently so that it's always at the top of the list.

Get started

Clone a repository

Get code from an online repository like GitHub or Azure DevOps

Open a project or solution

Open a local Visual Studio project or .sln file

Open a local folder

Navigate and edit code within any folder

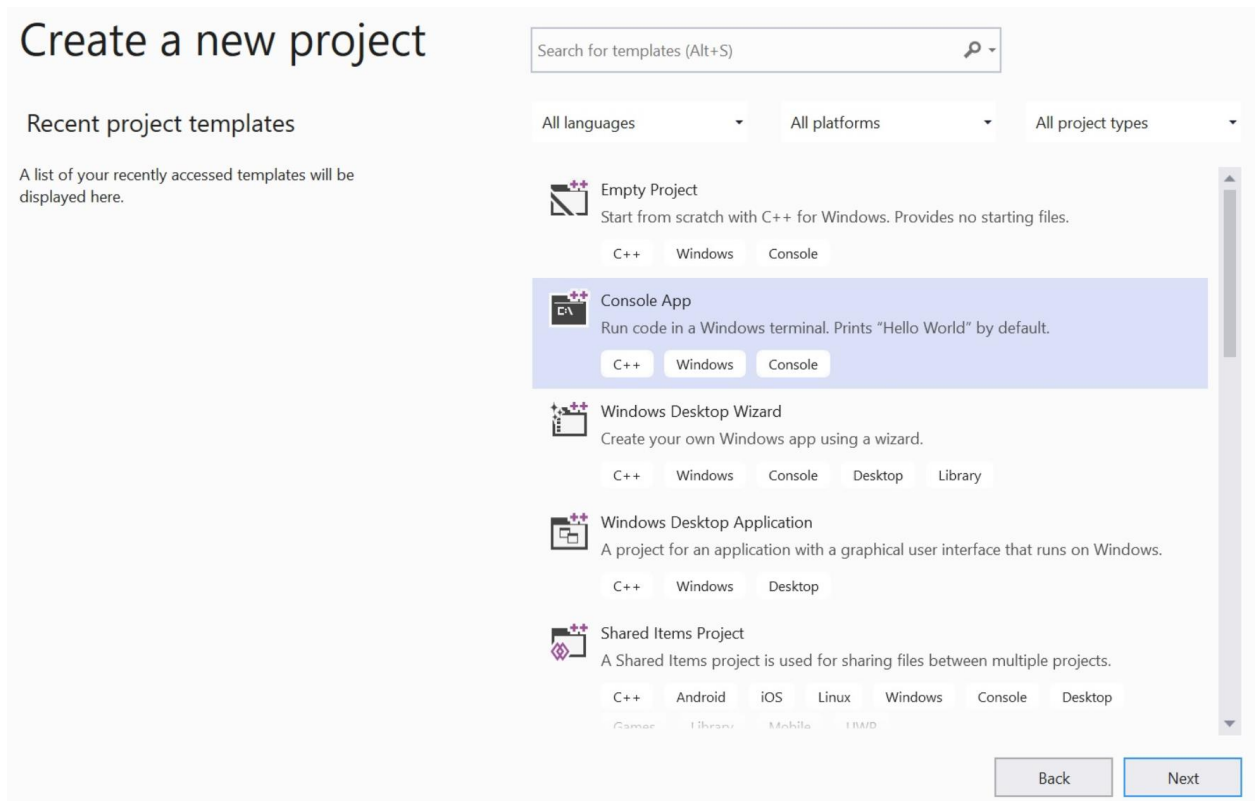

Create a new project

Choose a project template with code scaffolding to get started

[Continue without code →](#)

5. Select “Console App” then click on the “Next” button.

6. You can now start working on the lab exercises!
